

TOMORROW'S TECHNOLOGY FOR TODAY'S NAVY

Helping the Navy in its vision to pioneer, field and employ game-changing capabilities to ensure *Information Dominance* over adversaries and *Decision Superiority* for commanders, operational forces and the nation.

An integrated data and communications network coupled with tight security is vital to a sailor on land or at sea. Emtec Federal provides the planning, procurement, development, integration, security, management and maintenance services to keep you current with the most advanced technology.

Infrastructure Services

Emtec Federal delivers comprehensive lifecycle Infrastructure Services. You can purchase from us through the Seaport Enhanced contract.

IT Service Management We design, configure and install Business Service Management tools to help you deliver the service levels you require.

Procurement and Lifecycle Services We are your one-stop IT source, offering product acquisition from a broad vendor set, design and implementation, and ongoing support.

Infrastructure Optimization We design and implement virtualized infrastructure solutions that optimize distribution and availability of IT services across your organization.

Managed Services Count on us for ITSM and ITIL managed services, managed desktop and server architecture support, database administration, application development support services, and managed print services.

Application Services

Emtec Federal combines expertise in diverse technologies with experience across the Federal Government to deliver applications that solve business problems, improve operational efficiency, deliver relevant content, and optimize the use of information.

Development Maintenance and Support We design, develop, and support custom services and applications for enterprise-wide and mission-critical deployments.

Package Implementation We make implementing enterprise applications simpler by providing a "one-stop" solution for all of your implementation needs.

Validation and Verification We provide independent assessments of your software and applications to determine if it meets specifications and fulfills intended purposes.

Information Management We leverage data integration and information architecture, delivery and management to ensure IT supports warfighter requirements and decision-making.

Compiling data from multiple sources into useful and intelligent information can be a challenge. Emtec Federal can help organizations evaluate and process unstructured data from sources such as UAVs or in theater. Information can be turned into actionable intelligence which can ultimately contribute to the Navy's goal of Information Dominance as well as help prepare and protect the warfighter.

IT Consulting

From big picture strategy and planning to small details in performance and governance, process improvement and security and compliance, Emtec Federal delivers the expertise and experience you need.

IT Strategy and Planning Our experts align your IT service delivery with your mission's operations and objectives.

IT Performance and Governance We can provide tools that measure the effectiveness of your IT resources and services – and help you establish a value-based approach to IT management.

IT Process Improvement We can audit your IT processes and technology against industry best-practices and provide recommendations for improvement, plus facilitate ITIL-based methodologies.

IT Security and Compliance Our security and compliance experts can identify potential risks to your IT infrastructure and information assets and help you develop appropriate risk metrics, security, governance and compliance policies and procedures based on best practices.

Cloud Solutions

Cloud computing is transforming the way that IT services are consumed and delivered, and Emtec Federal is prepared to help the US Navy capitalize on the opportunities that it presents. From understanding the promise of cloud-based services for your organization, to implementing a cloud-based delivery model, we have the skills and expertise to help.

Cloud Strategy We help you identify which of your services would best be delivered via the cloud and develop a methodology to migrate them.

Cloud Development Our developers can help you design, deploy, maintain and support applications for the cloud platform.

Infrastructure Optimization We deliver cloud platform expertise to help you deliver applications and services on public, private and hybrid cloud platforms.
