

DELIVERING MEASURABLE RETURN AND VALUE ON IT

Emtec is a global IT services and systems provider driven by a singular mission: to help organizations across a broad range of sectors realize fast and full return on their IT investments. We help our clients plan, procure, develop, integrate, implement, manage and maintain their IT processes, systems, and applications to align with organizational goals.

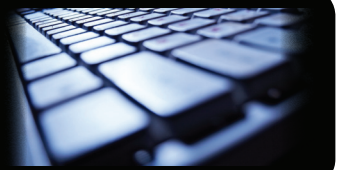

CONSULTING SERVICES

From big picture strategy and planning to sweating the details on performance and governance, process improvement and security and compliance, Emtec IT Consulting Services deliver the expertise and experience you need, when you need it.

- ▶ **IT Strategy and Planning** - Our experts align your information technology service delivery with your organization's IT operations and objectives.
- ▶ **IT Performance and Governance** - We can provide tools that measure the effectiveness of your IT resources and services – and help you establish a value-based approach to IT management.
- ▶ **IT Process Improvement** - We can audit your IT processes and technology against industry best-practices and your peers to provide recommendations for improvement, plus facilitate ITIL-based process improvement within your organization.
- ▶ **IT Security and Compliance** - Our security and compliance experts can identify potential risks to your IT infrastructure and information assets and help you develop appropriate risk metrics, security, governance and compliance policies and procedures based on best practices.

APPLICATION SERVICES

Emtec combines expertise in diverse technologies with experience across a wide array of industries to deliver applications that solve business problems, improve operational efficiency, deliver relevant content, and optimize the use of information.

- ▶ **Development Maintenance and Support** - We design, develop, and support custom services and applications for enterprise-wide and mission-critical deployments.
- ▶ **Package Implementation** - We make implementing enterprise applications simpler by providing a “one-stop” solution for all of our customer's implementation needs.
- ▶ **Validation and Verification** - We provide independent assessments of your software and applications to determine if it meets specifications and fulfills intended purposes.
- ▶ **Information Management** - We leverage data integration and information architecture, delivery and management to ensure IT supports business demands and decision-making.

CLOUD SOLUTIONS

Cloud Computing is transforming the way that IT services are consumed and delivered, and Emtec is prepared to help our clients to capitalize on the opportunities that it presents.

From understanding the promise of cloud-based services for your organization, to implementing a cloud-based delivery model, we have the skills and expertise to help.

- ▶ **Cloud Strategy** - We help you identify which of your services would best be delivered via the cloud and develop a methodology to migrate them.
- ▶ **Cloud Development** - Our developers can help you design, deploy, maintain and support applications for the cloud platform.
- ▶ **Infrastructure Optimization** - We deliver cloud platform expertise to help you deliver applications and services on public, private and hybrid cloud platforms.

INFRASTRUCTURE SERVICES

Emtec delivers comprehensive lifecycle Infrastructure Services – from requirements analysis, selection, planning, design, procurement, deployment and technical support, to ongoing service management and outsourced managed services.

- ▶ **IT Service Management** - We design, configure and install best-of-breed Business Service Management tools to help you deliver the service levels demanded by your organization.
- ▶ **Procurement and Lifecycle Services** - We are your one-stop IT source, offering product acquisition from a broad vendor set, design and implementation, and ongoing support.
- ▶ **Infrastructure Optimization** - We design and implement virtualized infrastructure solutions that optimize distribution and availability of IT services across your organization.
- ▶ **Managed Services** - Count on us for outsourced IT services, including ITSM managed services, managed desktop and server architecture support, database administration, application development support services, and managed print services.
