

On Premise OBIA Fixed Bid

OBIA Introduction

Oracle Business Intelligence Applications (OBIA) pre-built BI solutions deliver intuitive, engaging intelligence for multiple levels of users in an organization. OBIA empowers an organization's users to make better decisions, actions, and business processes. Working in conjunction with Oracle's line of ERP products, such as Oracle E-Business Suite and PeopleSoft, these solutions enable organizations to gain analytical insight from their transactional sources and create a paradigm shift in enterprise analytics.

However, many organizations hesitate to implement this powerful tool because they view it as a major undertaking. OBIA implementations can be budget and resource intensive efforts that require both the business and IT to invest a lot of their time and effort in deploying, configuring, and testing a meaningful solution. Often organizations that have already purchased OBIA do not implement it due to resource and budget constraints.

For these situations, Emtec has the answer. Leveraging our experience with multiple OBIA deployments across various industries, we have designed an accelerated implementation offering that allows us to partner with companies to quickly and effectively bring their OBIA environments online. Emtec has developed a vast library of best-practices and process accelerators that ensures implementations are executed in a short amount of time, yet do not sacrifice on the quality of the product delivered.

EMTEC TECHNOLOGY EXPERTISE

- Oracle Business intelligence
- Oracle BI Cloud Services
- Oracle Big Data Discovery
- Salesforce Wave Analytics
- Microsoft Power BI
- Enterprise DataWarehousing
- Oracle ERP Cloud
- Oracle HCM Cloud
- PeopleSoft FSCM
- PeopleSoft HCM
- EBS
- Hyperion EPM
- Planning & Budgeting Cloud Services

EMTEC SERVICES

- Advisory
- Strategy
- User Adoption
- BICC
- Implementation
- Managed Services

• Source

- EBS R12+
- PeopleSoft 9.2+

• Duration

- 10 Weeks

• Deliverables

- Dev/QA/Prod Environments
- Enabling all OOTB reports and dashboards
- Customized Training
 - User Training
 - Admin Training
- Implementation Documentation
- Data Lineage
- Integrated Enterprise Security

• Tasks

- Installation & Configuration
- DW Population
- SIT/System Validation
- RPD & Catalog Alignment
- Data Validation
- UAT
- Security Implementation
- User Enablement
- Go Live
